

Seeknit

To celebrate our 100th anniversary, we launched a new brand called Seeknit to help you seek and explore your own world of knitting.

Through our products and various activities, we thought that we could bring knitting closer to you. Kinki Amibari will continue to contribute to and promote the ongoing culture of knitting.

Seeknit
founded in 1916

We can create knitting with our own hands and re-knit it into a new shape, keeping it at hand instead of throwing away because it is old.

In an era where many things are born and thrown away at a dizzying speed, it is precious and irreplaceable to make an investment of our time and cherish limited resources. The mission of the Kinki Amibari is to enrich living and the natural environment through knitting.

Knitting Helps a Sustainable Life

Bamboo is a renewable resource as it grows extremely quickly. Using bamboo means very little environmental impact and logging bamboo for products such as knitting needles means giving more room to protect our forests. One of the reasons that people have preferred bamboo throughout the years is that it is natural and environmentally friendly.

Made by skilled craftsmen

Bamboo is different in nature, depending on where it is grown, the season, and the variety. For this reason, only skilled craftsmen who have the flexibility to work with these properties are able to manufacture stable quality bamboo knitting needles.

In 2016, Kinki Amibari celebrated its 100th anniversary. Over these years, we have devoted ourselves to making the best use of our accumulated skills and expertise to improve the quality of our products and to develop easier-to-use knitting needles.

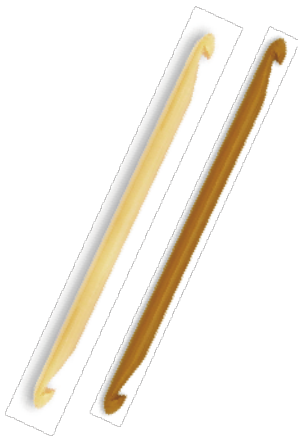

We developed the asymmetric circular needle that makes it easier to work small diameters and the circular needle that has a cord that doesn't twist. These are just two examples of how our products came to life based on careful examination of ideas and repetition of trial and error.

Our product line that includes not only variation, but also innovative ideas such as the asymmetric needles or rotating joints is a direct reflection of our history of development.

Product Lines

The Seeknit brand offers two types of knitting needles, the Koshitsu line that has a brown tint and the Shirotake line that is the natural color of bamboo. Both are creations of our skills. Find the knitting needle that suits you best, to take you to your world of knitting.

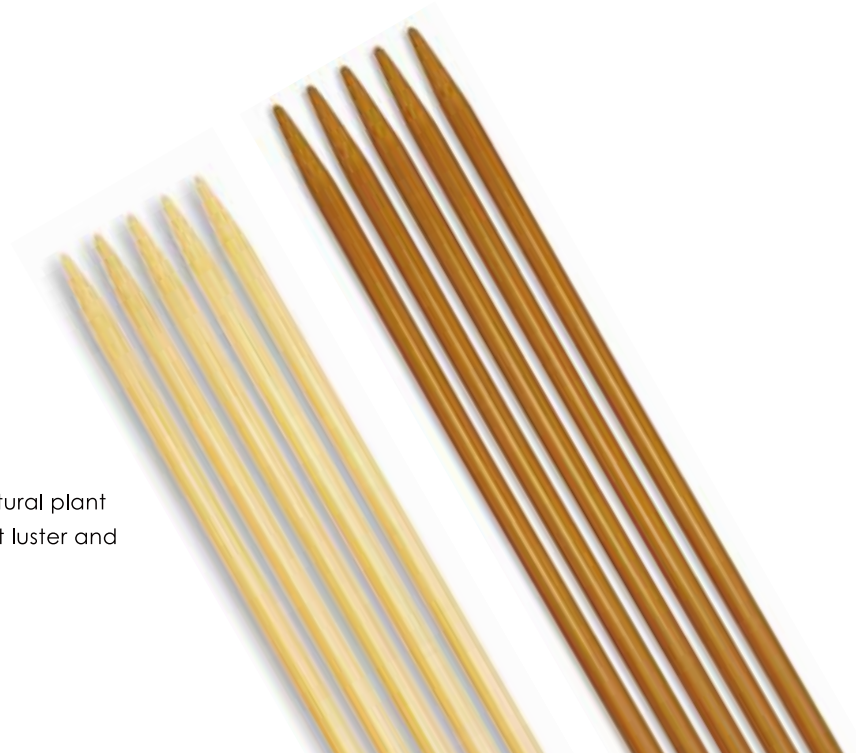

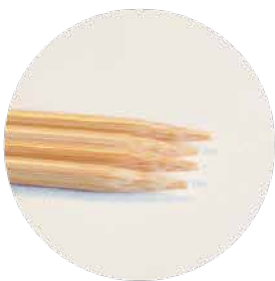

Shirotake

The surface finishing polished with natural plant wax gives Shirotake needles excellent luster and fine texture.

Koshitsu

After going through Kinki Amibari's unique high temperature and pressure treatment, Koshitsu needles are carefully polished with natural plant wax. This special treatment gives the bamboo extra durability and helps prevent damage from outside environmental influences. Moreover, it has an effect of preventing the needles from warping. The surface treatment makes a comfortable and smooth movement of threads and warm touch.

Point 01

The finely ground needle tips make it easier to pick up stitches.

Point 02

The carefully polished surface is soft to the touch and the yarn slides off easily.

Point 03

The size is laser-printed so it won't rub off.

Point 04

KA knitting needles use a rotating swivel cord to prevent the cord from twisting.

Point 05

The asymmetric circular needle is a KA original product developed to knit small diameter tubes such as socks comfortably. One of the needles is just one centimeter shorter than the other, and that makes a big difference in smoothness and comfort.

02 Circular Needles

KA original circular needles with swivel cord connectors make knitting smooth because the cord does not twist. Our circular needles are light and the cable is flexible. For knitting small diameter tubes (socks, sleeves, gloves, hats, cowls and vests), some knitters prefer using two circular needles or magic loop method instead of multiple double pointed needles to work in the round.

■ What are interchangeable circular needles?

Interchangeable circular needles are products that allow you to mix and match cord joints, joint converters, stoppers and other parts or to customize circular needle sizes and shapes as you like.

■ We adopt 3 sizes of screw for needle tip and cord, M1.8, M2 and M4.

You can joint needle tip and cord directly with the same size of screw and downsize the screw size using the converter.

■ What to be careful of when selecting interchangeable circular needles.

If the total length of the needle tips exceeds the length of the cord, you will not be able to use them as circular needles.

■ Combine the parts.

You can extend cord lengths with Cord Joints, connect needles and cords of different screw diameters by using Joint Converters, or attach Stoppers to the end of cords to make single point needles.

04 Single Pointed Needles

KA's carefully finished lightweight single pointed needles are standard knitting needles, ideal for beginners who are just starting out. Use single pointed needles to knit sweaters, winter scarves, and cushion covers.

05 Double Pointed Needles

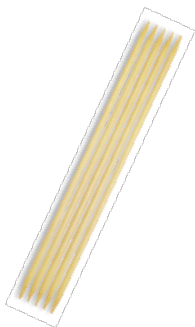

Double pointed needles that can make small circles are ideal for knitting small items. Attach a rubber cap to one end to use as a single pointed needle as well. Use double pointed needles to knit socks, gloves, and sleeves.

06 Crochet Hooks

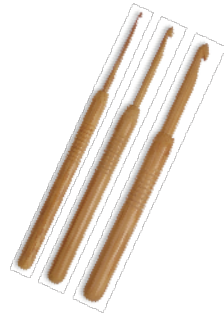

Crochet and afghan hooks are perfectly formed and carefully polished to make it easier to hook the stitches and knit complex designs. Our crochet hooks with grips have grooves to make it easier to hold and to prevent slipping. The grips stabilize the tips to make knitting comfortable and less tiring on your hands. Crochet hooks come with an aluminium tip or a bamboo tip. Use crochet and afghan hooks to knit hats, bags, blankets, and other creations.
